BOTSWANA

From the vast expanse of the Kalahari Desert, to the countless national parks and wildlife management centers, Botswana is a wilderness paradise. The most famous reserve, the Chobe National Park, is home to the largest concentration of elephants in Africa. Animals roam wild and free in their natural habitat, in harmony with the humans that interact with them. The animal life and natural beauty of the renowned Okavango Delta, the world's largest intact inland delta, makes it a prime spot for safari adventures, bearing one of the world's most diverse collections of wildlife, with over 200 000 species of mammals, 400 species of bird and 70 species of fish. Botswana's natural beauty, extensive animal life and cultural diversity make it a sought after destination for travelers and safari enthusiasts. The photographic opportunities on game drives in open four wheel drive vehicles is the real "out of Africa experience". Combine your Big Game viewing in Chobe National Park / Moremi or Savute Game reserve in open game safari vehicles or in the dug out canoes called Mokoro in the Okavango Delta. A safari experience never to be forgotten.

The following itinerary is an example of one of the many combinations safaris available in Botswana. Contact us for further fly-in safari suggestions and rates for the many safari camps that are so unique to Botswana.
